# WEATHERTIGHT WARRANTY

## *Guaranteed Protection Against Water Leaks*

### CHOOSING A WEATHERTIGHT WARRANTY

Investing in a metal roof is a long-term solution that when properly installed can provide decades of leak-free service. A Weathertight Warranty helps protect that investment by giving your customers a guarantee against water leaks, ensuring the use of a quality metal roofing system, proven installation details, project oversight and installer accountability.

### Peace of Mind that is Customized, Flexible and Reliable

Available to select installers of Integrity Metals products, we are pleased to offer several weathertight warranty options from one of our trusted partners†, all designed to give you the competitive edge you need. Issued through a joint responsibility agreement, the installer, together with the warranty provider, guarantees that the roof will remain leak-free for the duration of the warranty. During the first 24 months of the warranty period, the installer is solely responsible for covering any repairs resulting from a roof leak.

#### NO DOLLAR LIMIT

Covers material and labor for repair with no dollar limit.

#### LIMITED TO INSTALLED CONTRACT

Covers material and labor for repair up to original amount paid.

ONLY

#### LIMITED DOLLAR VALUE

Covers materials only limited to price/sq. foot originally paid.

Each weathertight warranty is customized to meet the specific needs of your metal roofing project.

- ✓ Coverage options to fit any budget
- ✓ Project oversight including on-site roof inspections
- ✓ Flexible terms from 5 to 25 Years

### ELIGIBILITY FOR INSTALLERS

Installers who demonstrate a high degree of quality workmanship and customer service, and possess a sound financial background, including being in good financial standing with Integrity Metals, are eligible to apply for a WTW. First time applicants should be able to provide references for successfully completed projects of similar size and scope to that which they are requesting a warranty.

### Inspections Designed for Long-Lasting Performance

Essential to a successful Weathertight Warranty Program is the inspection process. To ensure a well-built, leak-free roof, each inspection is designed to certify that an installation is completed using the materials, quality workmanship and details specified for the project. This accountability is what provides specifiers and building owners the peace of mind that their roof was installed properly.

# Eligible Integrity Metals Roofing Systems

Weathertight warranties are available on commercial, industrial and government installations for most of our standing seam profiles. While projects of all sizes are eligible, pricing will reflect the minimum fee based on WTW type and term regardless of actual square footage. Project design, environmental conditions or building geometry may affect a panel's eligibility for a WTW.
